

Citadel Class Platform Rigs

- Can be constructed on a contract-specific basis to client's exact specifications
- Several platform rig designs and configurations available to suit most any requirement

- Design Configurations**
- Self-erecting (bootstrap) installation and removal
 - API standard package rig (requires derrick barge for lifting onto platforms)
 - Dynamic: self-erecting for operations on deep water floating production facilities or those located in seismically active areas. Spartan's management (while at Pool Offshore) were the first in the industry to develop this concept which is now widely utilized in the industry.

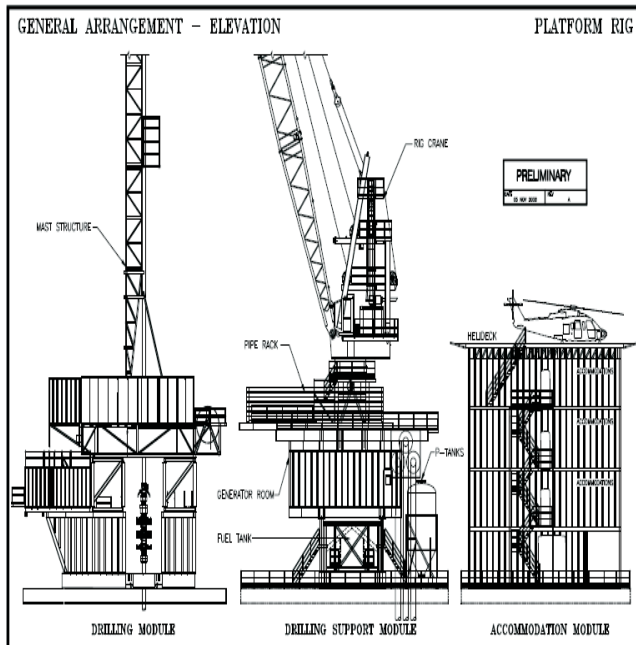

Photo depicts a typical floating production rig installation

Platform rigs are supplied on a new-build basis, subject to contract term.
